# Fix it, Don't Disc it

Stop Ephemeral Gully Erosion  
and protect your USDA Benefits

## Got a Gully?

If you farm highly erodible land, a light discing to fix a gully could now jeopardize your eligibility for USDA benefits. If you have gullies on HEL land, **please visit your local NRCS office** to discuss alternative treatment options to meet conservation compliance requirements.

Ephemeral Gullies

## Fix it, Don't Disc it

Here are a few natural resources conservation practices and management options available to help farmers voluntarily fix ephemeral gullies. Additional practices include: conservation crop rotation, contour buffer strips, contour farming, stripcropping, terrace and water and sediment control basin.

No Till
